

The company **GLAMPING LA CEPA**, identified with Nit. 901461690 – 8, located in El Peñol, Antioquia, Colombia, has prepared this policy in compliance with the provisions of the law, which informs its customers, suppliers, employees, and the general public, in order to sufficiently inform about its content of the "**ENVIRONMENTAL SUSTAINABILITY POLICIES**" and they are the following:

1. In Waste Management, implement a waste sorting and recycling system, promoting reduction, reuse and recycling in all areas of Glamping.
2. For the Conservation of Natural Resources, promote the responsible use of water and energy, encouraging savings and efficiency practices. In addition, we will protect the local flora and fauna, avoiding any damage or interference in the surrounding ecosystems.
3. For eco-friendly practices, use eco-friendly and biodegradable materials and products in our facilities. We promote the use of sustainable transport, such as bicycles or public transport, to minimise our carbon footprint, as well as the use of kayaks and paddleboard boards for rides and enjoyment in the reservoir.
4. Environmental education, providing information and awareness to our guests about the importance of environmental sustainability, encouraging them to adopt responsible practices during their stay.
5. Collaboration with the local community: Work together with the local community to support projects and programs that promote environmental conservation, generate sustainable employment, and improve the quality of life for residents.

These policies commit us to operating responsibly and sustainably, seeking to minimize our environmental impact and contribute to the well-being of both the natural environment and our community.
